OUR MODEL

How Change *actually holds.*

Change doesn't happen all at once. It happens in stages, and each stage matters. Most people skip steps — trying to regulate before they stabilize, trying to process before they have the capacity — and it often doesn't work, or it's very taxing. At Impact Minds, we start exactly where you are. We believe in looking at the whole picture: body, mind, and soul.

01 Stability

Predictable structure that holds steady when the nervous system can't yet.

02 Capacity

Looking at the biological factors that affect readiness for deeper work.

03 Regulation

Practicing calm under real, controlled stress — not just talking about it.

04 Ownership

Turning new behaviors and habits into a new identity.

+ Acceleration — Neurofeedback, TMS & brain mapping are used when clinically appropriate to support engagement with the work. They never replace it.

WHO WE SUPPORT

Anxiety & Stress · Depression · Trauma & PTSD · ADHD & Focus · Mood Instability · Personality Disorders · Bipolar · Eating Disorders · Substance Use · School & Work Overwhelm

What if *it was fun?*

SENSORY IMMERSIVE

360° Immersive Experience.

Sound, light, and projection evoke emotions and stressors so skills are better memorized and practiced in a safe space — not just discussed in one.

MOVEMENT LAB

Movement to Momentum.

Change happens in motion — challenges present a reward, and better circulation helps the brain naturally absorb the work.

"One framework. Every level of care. Only the dose changes."

🕒 **Office Hours** Monday–Friday, 10am–7pm

✅ **Placement** Assessment-driven, not preference

"You don't have to figure this out alone."

LEVELS OF CARE

One System. Three doses.

The same clinical model — stability, capacity, regulation, ownership — delivered at a different intensity for where you are right now.

PHP	5 hrs/day · 5 days/wk	Highest structure — for when daily life can't currently hold on its own.
IOP	3 hrs/day · 3–5 days/wk	The heart of the work — regulation meets real life, while living at home.
Resilience (RLA)	3 hrs/day · 1–2 days/wk	Momentum — consistency and ownership, without clinical intensity.

Built On Evidence, not just effort.

Objective, measurable tools that add real data to the picture — so progress is tracked, not just described.

Comprehensive Labs

Checking for insufficiencies or imbalances that can affect mental health and well-being.

Wearable Monitoring

Ongoing sleep, HRV & stress trends, when clinically appropriate.

Advanced Neuroscience Tools

TMS jumpstarts the brain, while neurofeedback trains regulation in real time, when clinically and age appropriate.

Your Environment Matters

Parent & partner workshops help the people around you understand what you're going through.

For Referring Providers

We coordinate care, share updates when authorized, and answer fit questions any time. Placement is assessment-driven, not preference.

🕒 **Office Hours** Monday–Friday, 10am–7pm 📅 **Saturday Workshops** Psychology · Parenting · Life Skills

Real change doesn't start with willpower — it starts with a body that actually has what it needs. That's why we look at the whole picture before asking anyone to sit with hard feelings: full lab panels, real sleep, real movement, not just a conversation. And it's why support doesn't stop the day a program ends. Change is fragile right after it happens — your environment matters. Our parent & partner workshops and Resilience program are built to create a soft landing, during and after programming, while independence is being tested. And if you'd like to stay connected, our community is there — the Vibe at Impact, an after-hours community that meets in the same space, open to everyone, not just those who came through PHP or IOP. Everybody needs somewhere to belong.

We invite you to a new era of mental wellness.

"Stronger than yesterday."

A space designed to support calm and focus.

LET'S TALK

Let's Start *the conversation.*

Call or text our team, schedule a tour, or ask us anything.
There's no pressure here — just clarity about what your
next step could look like.

Everything, in one scan.

Programs, tours, resources, forms, and
everything you need to reach our team
— in one place.
